

The Hungarian Association of Grant Application Consultants (Pályázati Tanácsadók Országos Szövetsége, = PATOSZ) was formed in 2003. Its mission is to represent the sector of the Hungarian grant consultants, to improve the grant system in Hungary and to serve the customer at the highest level. Major activities on the field of grants comprise: work-shops, conferences, professional consultation with the grant scheme provider authorities and also projects for them if required.

PATOSZ evaluates every year the Hungarian grant system, prepares several studies/year on it. Proactively contacts the authorities to improve the calls, to speed up the grant system.

PATOSZ has positioned itself as a Partner for authorities, Chambers and professional associations.

We have 42 members, mainly grant consulting SMEs, a few private consultants, some foundations and a county municipality also.

Our suggestions have been frequently incorporated into the new grant schemes. All together we had proposed about 2,500 corrections/ 7 years. About 50% of them were integrated by the grant institutions on an average between 3 days - 24 months.

The applicant consultant organisations have to have good knowledge of the grant system in Hungary, proven expertise, and references.

Our Code of Ethics gives the respective guideline and our Committee of Ethics is the watchdog for preserving the good reputation.
